# eDCase**MAN** 2.0

First of its kind eDiscovery workflow tool that captures/guides all human interaction before data preservation and collection. Fully capable to support law firms of any size in serving their clients better and levelling up their internal transparency with real time dashboard on all your eDiscovery cases. Finally brining an option to structure the data at your clients.

Law firm service extension

eDCaseMAN can be configured to meet your clients needs and how they should be involved, as a managed service or on-premise installation. Give the customers real-time status access and involve them where most efficient which of course is possible to modify over time to accommodate workload and organisation.

Realtime Case status

eDCaseMAN offers real time dashboards giving you a full overview of all your cases. Always keeping you on top of things enabling you to make informed decisions. Independent of how many cases you have you can always drill down to the information you require.

Full chain of custody

eDCaseMAN documents every step in the process from the initial legal request till completion of data collection. You will always have a full COC available in human readable format enabling you to put it forward shall you be required to do so.

Full eDiscovery project management

eDCaseMAN offers complete eDiscovery Project Management no matter how complex your internal processes may be. We are able to adjust depending on your needs and requirements. Within just a few minutes of work we will be able to make changes on the fly or even create an entire process from scratch. The software will blend into your daily work load

eDCaseMAN workflow scale up and down

The software workflow and roles are totally flexible and will increase or decrease in complexity to fit the current environment of your client and your law firm. **For smaller teams** a simplified but still best practice orientated process has been marked in grey in the bellow icons. A full e-Discovery Collection lifecycle, marked in green, especially designed **for large in-house eDiscovery teams** ensures your client is as efficient as he can get together with you.

e-Discovery best in class workflow

1 Request creation

2 Request On-boarding

3 Custodian Scoping

4 Custodian Investigation

5 Order generation

6 Order management

Specifications

Independent of how you deliver the e-Discovery services to your clients, **eDCaseMAN** supports everything done prior to the data collection process from A to Z. It can be offered as an extended service from your law firm in getting the data in a more structured and defensible way. Such as getting real time information on all your internal cases on the dashboards. Enabling your law firm to have a better overview of your cases and lawyer performances and getting a competitive advantage in the eDiscovery sector.

eDCaseMAN enables your clients to gain up to 30% cost savings by scoping and validating your custodians and the requested data types before you execute the actual collection of the data and delivering them in a structured way. You hereby raise the defensibility of your clients cases enabling you to deliver information about the time it takes to collect based on location, date range and data types and every detail will always be available on your dashboard.

eDCaseMAN does not require you nor your clients to have a major technical environment. It's a virtual appliance which simply needs access to an SMTP Server to be able to send out emails triggered in the workflow. It can be put behind as many firewalls as you would like or in a secure cloud environment, totally flexible and depending on your needs.
